

Sinclair Broadcast Group's practices are not in keeping with the goals and standards of local media coverage. Sinclair is obligated by law to serve the public interest. Their free use of public airwaves obligates them to proper and sensible applications of that power, but their actions do not reflect those principles that are commonly accepted as democratic, unbiased, and in the public interest of non-partisan news and programing.

I object to Sinclair's actions. As a citizen and voter, I suggest that the FCC show more discernment and control over the license renewal process and media ownership rules. This democracy needs strong, independent local media who serve their communities. Thank you.
